

Up to \$50K in Training at No Cost With the Purchase of a DGX System

Jump-start the delivery of your AI-based solutions with technical training.

Training Is Key to Success

Training is crucial for successful adoption of any innovative technology, particularly when it comes to tapping into the full potential of an NVIDIA DGX™ system. With hands-on technical training from NVIDIA, individuals and organizations can learn how to achieve cutting-edge breakthroughs with AI. The NVIDIA DGX platform is ideal for tasks like image recognition, natural language processing, recommender systems, and creating 3D virtual worlds.

This promotion is designed for companies looking to enhance the skills of developers, data scientists, technical artists, and administrators, so they can more quickly develop and deploy AI solutions. All courses are created and taught by NVIDIA experts, bringing real-world experience and deep technical knowledge to every learning experience.

How the Promotion Works

Up to \$50,000 in purchases of NVIDIA Training (workshops, courses, and certification exams) can be applied as a discount to DGX system purchases. The amount of the discount depends on the amount of training purchased and the size of the DGX system being purchased.

- For DGX B200, DGX B300, and DGX Rubin NVL8 systems:
 - If the DGX system has 2–15 nodes, up to \$10,000 in training services purchased can be applied as a discount to the order.
 - If the DGX system has 16+ nodes, up to \$50,000 in training services purchased can be applied as a discount to the order.
- For DGX GB200, DGX GB300, and DGX Vera Rubin NVL72 systems, up to \$50,000 in training purchased can be applied as a discount to the order.
- A minimum of one NVIDIA software SKU (NVIDIA Mission Control™ or NVIDIA AI Enterprise) must also be included on the DGX system order.

Take advantage of this offer:

- Verify eligibility by talking with your DGX provider.
- Purchase NVIDIA Training and apply the amount purchased as a discount on DGX systems (maximum discount is \$50,000).
- Schedule training with NVIDIA.

Eligible Products

- > All DGX systems are eligible, including DGX B200, DGX B300, DGX GB200, DGX GB300, DGX Rubin NVL8, and DGX Vera Rubin NVL72.
- > To be eligible for this promotion, the training can be purchased either before or with a DGX system.
- > Training can include any instructor-led workshop or bootcamp listed in the NVIDIA Training course catalog that's delivered by NVIDIA.

Terms and Conditions

- > Is valid worldwide
- > Is limited to a maximum discount of \$50,000 per customer
- > Only applies to training delivered by NVIDIA
- > Doesn't apply to NVIDIA training purchased after a DGX system is purchased
- > Doesn't apply to DGX Cloud
- > Promotion only applies to purchases of DGX hardware and support; it does not apply to NVIDIA AI Enterprise or Anypoint Community Manager software.
- > Promotion is ongoing and valid until it is ended by NVIDIA. NVIDIA will provide a 30-day cancellation notice prior to ending the promotion, and all existing eligible quotes will be honored.
- > The benefits offered in this Program are not conditioned on any exclusivity. Nothing in this Program prevents NVIDIA or its customers from participating in similar arrangements with third parties.

Training Benefits

- > Accelerate project development and deployment.
- > Gain immediate access to industry-standard tools and frameworks.
- > Choose from flexible training options.
- > Get trained by experts in AI, accelerated computing, and advanced networking technologies.
- > Learn using real-world examples.
